

Welcome to the new J&T Dental Newsletter!

We are excited about what's happening in the office and we wanted to share our updates and accomplishments with you. The office is proud to announce that it has been over two years since the transition and start of Johnson & Trang Dental. As always, we highly value you as our patients. Your referral of friends and family is deeply gratifying!

What's new?

During the summer of 2018, we launched our own in-house insurance plan- the **Complete Care Program**. It is a great option for our patients without insurance or are about to retire. It covers all of your preventive care needs and entitles participants to a discount on dental work. Give Jodi a call for full details or see our brochure online.

What is the benefit of fluoride?

Remember fluoride as a kid? Well the benefits of **fluoride** are actually great for teeth regardless of your age. Drs. Johnson and Trang believe in a less invasive approach, which means a greater focus on preventive treatment and care. Fluoride is recommended during your regular hygiene visits, especially if you have a large number of fillings/crowns, high rate of decay, dry mouth, or sensitive teeth. The fluoride is applied quickly and easily as a varnish on the teeth. The solution adheres to the tooth surface, strengthening the enamel and making it more resistant to decay and less sensitive.

Did you know?

Drs. Johnson and Trang are both certified in **Invisalign®**. Invisalign is a way to correct teeth alignment without typical metal braces. The system uses a series of clear and removable trays to reposition and straighten teeth. Moving teeth will not only have an obvious esthetic benefit, but can also correct bite discrepancies or malalignment. Consultations are quick and at no charge. Ask at your next cleaning or call to see if you'd be a good candidate for Invisalign.

We celebrated our anniversary and the holidays by going out to dinner downtown. After, we saw Aladdin at the Detroit Opera House.

We are happy to work with the same great staff and welcome our newest member- **Soo Park** who assists part-time.

Case Showcase

Drs. Johnson and Trang hold themselves to a high standard of dentistry for every patient. They wanted to share some of their work with you.

Chipped Teeth

Have you ever bitten the wrong way on a fork? Well one of Dr. Johnson's patients sure did and chipped their front teeth. One appointment of bonding and you would never know!

BEFORE

AFTER

Old Crowns

One of our patients was unhappy with the appearance of their old, porcelain-fused to metal, crowns. Dr. Trang replaced them and completely changed their smile!

BEFORE

AFTER

Pink Composite

This patient has gingival recession. Not only were these areas sensitive, but also esthetically unpleasing to the patient. Dr. Trang used pink filling material (instead of the white) to restore the recessed areas with a natural appearance!

BEFORE

AFTER

Coming Soon

Pardon our dust. We will be undergoing some construction to improve our office layout in 2019. We hope you will like our new look!

Social Media
